## • ABOUT ME

Since i graduate college i was working as insurance agent. In last three years of my work i was responsible for strategic clients in my company. I led negotiations for our customers with insurance companies as PZU.S.A, TUIR WARTA S.A. ect, but i always wanted to do something else, and that was a programming. That's why i made the decision to develop in this way.

## • TECHNOLOGIES

### .NET

**C#** – mainly konsole applications and tasks from [www.pl.spoj.com](http://www.pl.spoj.com), [www.codingame.com](http://www.codingame.com), [www.codecombat.com](http://www.codecombat.com),

**WPF** – insurance offer configurator,

**MVC** – website with login panel and language selection.

### WEB

**HTML** – familiar with HTML for 21 years, rather as a hobby, dozens of projects have been made during this time, including a few commercial ones for the customers, for example [www.szlips.pl](http://www.szlips.pl),

**CSS3, BOOTSTRAP** – helpful tools in creating websites with which I have worked many times over projects.

### OTHERS

**GIT** – i know pull, push, commit, im begginer,

**Visual Studio 2017** – i know the concept of snippet, I know how to use a debugger, I know a few useful keyboard shortcuts, code writing conventions like camelCase, more or less Agile and SCRUM rules.

**SQL** – i wrote simple queries, I created a database based on XAMP and I used phpmyadmin. I used it to create a user database for logging in to a page written using MVC.

**IIS** – i worked on localhost with IIS, where I had to put an ASP.NET application, encountered some problems that I solved.

---

- **EXPERIENCE**

---

## **PROGRAMMING**

- website for EUROMAX company
- website for my previous employer: [www.szlips.pl](http://www.szlips.pl),
- An application wrote using .NET WPF Framework,
- website written using ASP.NET MVC, CV suplement: [www.easymodeoff.pl](http://www.easymodeoff.pl)

---
